Experience

React Developer at mobitouch
October 2022 - Present

Developing and maintaining software solutions using React & Next.js

React Developer at Seth Software
July 2021 - September 2022

- Developed an instance of Fahrel Monitoring (a fuel delivery camera monitoring system) for a big European fuel transport company (React, Redux, TypeScript)
- Maintaining the Cropchart ecosystem web apps (Cropchart, Cropchart Manager, Brigadier) - a CRM-like platform for farmers (React, Redux, AG Grid)

Junior Front-end Developer at Brand Active (powered by Divante)
January 2021 - June 2021

- Developing Shopify-based e-commerce websites with technologies like Shopify Liquid and React
- Maintaining Brand Active's WordPress-based company website - adding new case studies and features

Frontend Developer at Forkflow
May 2020 - January 2021

Developing a redesign of TheVeganKind (thevegankind.com), the biggest UK-based store for online vegan shopping
Technologies used: Vue, Nuxt.js, Shopify Storefront API, graphCMS, TypeScript, Jest + vue-test-utils for testing.

Projects

elektronik-timetable / "Plan lekcji express" (React, Next.js, TypeScript, Tailwind CSS - open source project):
a school timetable viewer that displays data based on static table-style web pages generated by VULCAN Optivum, used by 1,000+ students at ZSE Rzeszów, Poland
(project link, repository)

EconHacks website (React, Next.js, graphCMS, Figma):
an official website for an international, online, economics-focused hackathon network
(project link, repository)

Portfolio website (React, Next.js, Contentful, Figma)
